WaxStrip

Heavy Duty Fast Acting Floor Cleaner

Net Contents: On Containers

Caution:
For Professional Use Only.
Keep Out Of Reach Of Children.
Please read all precautions and SDS
before using this or any product.

A professional strength, fast acting no-rinse stripper that quickly emulsifies floor waxes, sealers and finishes. Kwik Strip will strip floors in less time and effort than conventional strippers due to its extremely aggressive nature, allowing cost savings by decreasing labor time. Will liquefy multiple layers of acrylic finishes at one time, making cleanup easy with an autoscrubber or floor machine. Lower odor allows for use in more places than traditional strippers.

The Diamond Shine floor program meets all ASTM standards for slip, detergent, and soil resistance.

Use Instructions:

1. Wet floors may be slippery so prevent pedestrian traffic with signs or barricades.
2. Dilute with from 1 to 5 parts water when manually stripping. Automatic scrubber solutions should be 1part concentrate with 10 parts water.
3. Liberally apply to small area of approximately 100 square feet covering completely and to the baseboards.
4. Allow 3 to 5 minutes for chemical action, but do not allow to dry on the floor. Agitate with mop or machine scrub, then pick up solution using a wet vac or automatic scrubber.
5. Damp mop with clean water to remove residue.

Danger!
Causes severe skin burns and eye damage.
Causes serious eye damage.

Prevention:

Do not eat, drink, or smoke while using this product.

Avoid breathing fumes, mist and overspray as much as possible. Use only in well ventilated areas.

Eyes: Wear safety glasses when handling product. Skin: Wear appropriate gloves to prevent skin exposure.

Clothing: Wear appropriate protective clothing to prevent skin exposure. Respirators: Follow the OSHA respirator regulations if exposure limits are exceeded or if irritation or other symptoms are experienced.

Precautionary Statements (First Aid):

Eyes: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Remove contact lenses if present and easy to do. Get medical attention immediately if irritation persists.

Skin: Immediately flush skin with plenty of water for at least 15 minutes while removing any contaminated clothing and shoes. Discard contaminated clothing in a manner which limits further exposure, making sure to wash before reuse. Contact a physician immediately if irritation persists.

Ingestion: Do not induce vomiting. If victim is conscious and alert, give 2-4 cups of water. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Inhalation: Remove from exposure and move to fresh air immediately and keep comfortable for breathing. If breathing is difficult, give oxygen. If breathing has ceased apply artificial respiration using oxygen and a suitable mechanical device such as a bag and a mask. Get medical attention immediately if irritation persists.

Notes to Physician: Treat symptomatically and supportively. Consult a doctor and/or the nearest Poison Control Centre for all exposures.
