Wash-N-Wax

High Foaming Hand Application Wash & Wax

Net Contents: On Containers

Caution:
For Professional Use Only.
Keep Out Of Reach Of Children.
Please read all precautions and SDS
before using this or any product.

Description

This product is a concentrate and is designed to be used as a high foaming car wash detergent. WASH-n-WAX is designed with the finest penetrating detergents, builders, solvents and chelates available on the market today. WASH-n-WAX can quickly penetrate, emulsify and remove even the most tenacious soils. All this is accomplished without the use of harsh caustics. This product is designed for hand washing of vehicles and imparting a polymer protective coating to the surface. This coating will enhance the gloss of the paint and repel water.

Directions

Use Wash-n-Wax at the rate of 1 oz. per 2 gallons of water. Wash vehicle from the bottom up doing only small sections at a time. Rinse thoroughly from top down. It is always preferable to wash vehicles in the shade as this will eliminate the detergent from drying on the paint surface. This product will help prevent mineral water spotting on chrome and paint.

Prevention:

Do not eat, drink, or smoke while using this product.

Avoid breathing fumes, mist and overspray as much as possible. Use only in well ventilated areas.

Eyes: Wear safety glasses when handling product. Skin: Wear appropriate gloves to prevent skin exposure.

Clothing: Wear appropriate protective clothing to prevent skin exposure.

Respirators: Follow the OSHA respirator regulations if exposure limits are exceeded or if irritation or other symptoms are experienced.

Precautionary Statements (First Aid):

Eyes: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Remove contact lenses if present and easy to do. Get medical attention immediately if irritation persists.

Skin: Immediately flush skin with plenty of water for at least 15 minutes while removing any contaminated clothing and shoes. Discard contaminated clothing in a manner which limits further exposure, making sure to wash before reuse. Contact a physician immediately if irritation persists.

Ingestion: Do not induce vomiting. If victim is conscious and alert, give 2-4 cups of water. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Inhalation: Remove from exposure and move to fresh air immediately and keep comfortable for breathing. If breathing is difficult, give oxygen. If breathing has ceased apply artificial respiration using oxygen and a suitable mechanical device such as a bag and a mask. Get medical attention immediately if irritation persists.
