

PRODUCT DESCRIPTION:

Bus Bright Concentrate is designed as a high foaming lubricating aluminum bus detergent with extra lubrication for drive through wash systems. The stable high level of foam will allow the product to cling well to the sides of the bus giving it an opportunity to penetrate as well as help lubricate the brush bristles. This in turn will eliminate the possibility of brush marking on the surfaces of the bus. **Bus Bright Concentrate** is highly buffered to protect the aluminum and any painted surfaces. This will thoroughly clean and shine the bus. Bus Bright Concentrate works extremely well through foaming devices.

DIRECTIONS:

Set the chemical metering so that one part **Bus Bright Concentrate** is mixed with up to 50 parts water going onto the bus surface. This is usually accomplished by venturi injection on the water flow to the brushes. Some systems apply the chemical via soap arch in addition to the brush application. Make sure that detergent is applied in both scenarios if that is the case.
