

VANILLA

MALODOR COUNTERACTANT

- **GARBAGE TRUCKS**
- **DUMPSTERS**
- **WASTE TREATMENT FACILITIES**
- **LAND FILLS**
- **RENDERING PLANTS**

APPLICATION METHODS

- **COLD FOG**
- **COLD SPRAY**
- **LIQUID INJECTION**
- **SPINNER NOZZLE IN TANKS**

VANILLA is designed as a powerful odor eliminator. **VANILLA** goes to the source to destroy the malodors. **VANILLA** should be used to control odors in land fills, waste treatment plants, garbage trucks, garbage containers, rendering plants, tank trucks, etc. **VANILLA** can be broadcast over large areas using cold electric foggers. The foggers will atomize the liquid and blow it over a large area to control odor. **VANILLA** contains odor counteractants and a pleasing fragrance to enhance the elimination of malodors.

Mix 1 part **VANILLA** with up to 20 parts water. Can be applied via a liquid injection system, fogger, pressure sprayer or spinner nozzles in tankers. Reapply as required.
